PROFESSIONAL SUMMARY

Third-year Bachelor of Science in Computer Science student at the University of Embu with hands-on experience designing and implementing software projects from concept to deployment. Developed and deployed a database-driven agricultural web platform using PHP, SQL, HTML, CSS, JavaScript and Bootstrap, and independently built a Java desktop banking application using Swing and H2. Strong interest in technology-driven problem solving, with developing skills in cloud computing, artificial intelligence and machine learning. Experienced Career Peer Advisor with strengths in communication, mentoring, teamwork and leadership, currently seeking an internship opportunity to apply technical skills while gaining practical industry experience.

TECHNICAL SKILLS

Programming: Java, Python, C++, JavaScript, PHP
Web Development: HTML, CSS, JavaScript, Bootstrap, PHP
Databases: SQL, MySQL, H2
Tools: Git, GitHub, Visual Studio Code
Software Development: Object-Oriented Programming, Database Integration, Debugging, System Analysis & Design
Computer Science: Data Structures & Algorithms, Computer Architecture, Artificial Intelligence
Developing Areas: Cloud Computing, Machine Learning, Cybersecurity

PROJECTS

AgriConnect — Web-Based Agricultural Information & Services Platform

Group Project | Lead Developer | PHP, SQL, HTML, CSS, JavaScript, Bootstrap

- **Conceptualized and initiated** AgriConnect as a web-based platform aimed at connecting users with agricultural information and digital services.
- **Led the technical implementation**, independently developing the application's front-end and back-end functionality within the group project.
- Built database-driven functionality using **PHP and SQL** for storing and managing application data.
- Developed interactive and responsive interfaces using **HTML, CSS, JavaScript and Bootstrap**.
- Implemented core platform functionality, including user interactions, messaging/chat functionality and administrative features.
- **Deployed the application to a live hosting environment using InfinityFree**, gaining practical experience with web hosting, database configuration and production deployment.
- Diagnosed and resolved issues involving database connections, sessions, application requests and server-side functionality during development and deployment.

Embu Bank System — Java Desktop Banking Application

Individual Project | Java, Swing, H2 Database, Object-Oriented Programming

- Designed and developed a **Java-based desktop banking application** to simulate core banking operations.
- Applied **Object-Oriented Programming (OOP)** principles to structure application components and system functionality.
- Designed and implemented an interactive graphical user interface using **Java Swing**.
- Integrated an **H2 relational database** for persistent storage and retrieval of application data.
- Connected user-interface components with application logic and underlying banking operations.
- Tested and debugged application functionality, resolving compilation, database and runtime issues during development.

Personal Portfolio Website

Individual Project | HTML, CSS, JavaScript, GitHub Pages

- Designed and developed a responsive portfolio website showcasing academic background, technical skills and software projects.
- Implemented interactive elements and responsive layouts using **HTML, CSS and JavaScript**.
- Deployed the website through **GitHub Pages** and maintained source code and updates using Git/GitHub.

EXPERIENCE

Career Peer Advisor — University of Embu Careers Services

Embu, Kenya | 2025 – Present

- Facilitate career-development workshops covering **CV writing, interview preparation and professional communication** to support student career readiness.
- Mentor **20+ students** through individual sessions focused on career planning, internship applications and professional development.
- Support mock interview sessions designed to strengthen students' confidence and interview preparation.
- Collaborate with University Careers Services to promote internship, employment and career-development opportunities.
- Develop promotional materials, including posters, flyers and social-media content, to increase awareness of career events and opportunities.
- Apply communication, leadership, mentoring and organizational skills while supporting students from diverse academic backgrounds.

EDUCATION

University of Embu — Embu, Kenya

Bachelor of Science in Computer Science | September 2024 – Expected September 2028 | Year 3, Semester 1

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Computer Architecture, Web Programming, System Analysis & Design

CERTIFICATIONS & TRAINING

- **AI Literacy** — IBM SkillsBuild | May 2026
- **Getting Started with Cybersecurity** — IBM SkillsBuild | September 2026

LEADERSHIP & ACTIVITIES

University Coding Club — Member

- Participate in collaborative coding activities, technical projects, programming challenges and peer learning within the university technology community.

CORE STRENGTHS

Problem Solving | Systems Thinking | Teamwork | Communication | Leadership | Mentoring | Presentation | Continuous Learning
